

Complete W-categories: a synthetic test paper

Let C be a W-category and let a, b be objects with morphisms $f : a \rightarrow b$. The inner produ

Let C be a W-category and let a, b be objects with morphisms $f : a \rightarrow b$. The in

Let C be a W-category and let a, b be objects with morphisms $f : a \rightarrow$

Let C be a W-category and let a, b be objects with morphisms $f : a \rightarrow b$. The inner produ

Let C be a W-category and let a, b be objects with morphisms $f : a \rightarrow b$. The in
They were introduced in [GLR85], but see also 1 and Yam07 for background.

Let C be a W-category and let a, b be objects with morphisms $f : a \rightarrow$
This notion is renamed the inner product (Definition 4.1). It is equivariant.

Compare Lemma 4.2 and the remarks after Proposition 3.9.
